How to Use: garyfyFigure.m

1. Run your code and produce your plots
2. Edit 'garyfyFigureOptions.m'
3. Type in garyfyFigure(input)
4. For 'input' either put the name of the figure you wish to change or put the string ''all'' (this will edit every figure that is currently open and visible

OPTIONAL INFO

(to have these figures automatically saved edit out the '%' at the very end of the 'garyfyFigure.m' code)

5. If you wish to save all open figures as .png files run the script 'SavePNG.m'.
6. Run SavePNG(#) or SavePNG('all')
